5. The company last paid interest on the ST note payable on November 1,2016. Record the accrued interest expense for the last 2 months of 2016. The annual interest rate is $8 \%$. Round to nearest whole dollar.
6. The Bonds Payable and related Premium amounts on the Nov. trial balance relate to the Jan. 1, 2016 issuance of the following bonds: On Jan. 1, 2016, the company issued 10\%, 10-year bonds when the market rate for similar investments was $8 \%$. The company pays interest each year on January $1^{\text {st }}$. On Dec. 31, 2016, use the effective interest method of amortizing the premium on bonds payable to accrue the interest expense for 2016. Round your interest expense calculation to the nearest whole dollar.
7. The Unearned Revenue amount on the Nov. trial balance relates to amounts that the company previously collected in cash for sales that were to be completed in the future. The company completed some of these sales during December and now owes only $\$ 16,000$ of that unearned revenue. Record the necessary adjustment for December 31, 2016.
