Project. HTML Web Page

Grade: **30% of the final grade**. 10% - codecademy training, 20% - personal Web page
Submission due date: November 13, 11:59 pm
Topic: Showcase an app or a website that is useful for students.
Assignment: Create a Web page on a given topic using plain text editor Notepad+, or
Steps:

1. Register at http://www.codecademy.com/. Create an account, using your real name, picture, e-mail and unique password (don't register with Google+ or Facebook) . After registration select an answer to 'What are you interesting in Learning?' - 'Specific Languages' – 'HTML & CSS'. Complete all tasks. Do not register for Pro. Save the login and password in the file named Lastnamefirstname.doc

2. Download one of the text editors: Notepad+, or TextWrangler, or Sublime Text

3. Create a topic for your project, and post it on Blackboard Discussion Board called 'Topics for Web page'. No repetitions, please.

4. Create the web page about the topic. It should fulfill all the requirements mentioned in the table below. All the HTML code should be typed in the downloaded text editor. Save the file as index.html

5. Type all the CSS code in the separate file in the text editor. Name the file stylesheet.css

6. Gather all other files and pictures, and compress all into an archive named Lastnamefirstname_web.zip

Submission Form: Go to Blackboard > Information > HTML Web page > Assignment submission section> Attach compressed folder *'LastnameFirstname_web.zip'* with :

1. index.html
2. stylesheet.css
3. Lastnamefirstname.doc with login and password to codecademy.com
4. Lastnamefirstname.xls with a table that will be replicated using the html code
5. Lastnamefirstname_background.jpg, image that you used for background
6. Any other images, or files that are needed in order to display all of the information within your page. Their names should start from 'LastnameFirstname_'.
