

CPT 242  
SQL Assignment 5

1. Find out *how many* orders were shipped late. An order is shipped late if the shipped date is later than the required date. Call the expression Shipped Late.
2. List the Product ID, Product Name, Units in Stock and CategoryID of all products in Category 2 **whose number of units in stock is more than average of all products. \*\*Hint: Use a subquery**
3. List the Product ID, Product Name, Units in Stock and CategoryId of all products whose **number of units in stock is more than the average units in stock of the products in Category 2. \*\*Hint: Use a subquery**
4. Using a subquery, list the Customer ID, Contact name, and country for all customers who do not live in USA, UK, Australia or Canada.
5. Using a subquery find all customers with no orders.
6. List the Employee ID and employee name (concatenate first and last names) who report to Andrew Fuller. Order the list by last name.
7. Show the Customer ID, Company Name and Contact Name of all customers with a company name that is, at most, 12 characters in length.
