The write-up should have proper referencing, citation & quoting. **At list 3-5 references. Harvard style**

Between 500- 1000 words

1. Present the news item you found about an organisation's IS-related outsourcing that has presented one or more ethical, political or security issues. Summarise the use of outsourcing and the issue(s) that arose as a result of the decision to outsource. Provide a link to the article if possible.

2. If the organisation you are studying in question 'a' outsources IS-related resources, explain how this is done. Evaluate the effectiveness of this outsourcing and analyse the reasons for its effectiveness or lack of effectiveness.

3. If your organisation has not practised outsourcing, discuss specific reasons for not choosing outsourcing as a strategy to meet organisational objectives. Analyse whether there are implicit or unstated reasons the company has avoided the use of outsourcing and how they might be justified. Has your organisation purposefully avoided it? If so, why?

4. Compare your findings from the news item to those from your own organisation. Propose two to three advantages and two to three disadvantages of outsourcing IS-related resources, supporting your views with appropriate sources and examples.
