

Question 2 – EXCEL required

Roll two dice and add the numbers. Roll the dice 40 times and record your results. Find the eight descriptive statistics in the Chapter 1 for this data set.

Note: all of the cells in this worksheet should be a formula.

Die 1	Die 2	Sum
4	2	6
2	4	6
2	4	6
5	6	11
2	4	6
2	2	4
2	3	5

The formula for Die 1 is =RANDBETWEEN(1,6) and the formula for Die 2 is =RANDBETWEEN(1,6) and the formula for the Sum is =SUM(A4:B4)

I have given you the formulas for the experiment and you need to find the formulas for the descriptive statistics.
