

## Geometry Midterm Exam

Score: \_\_\_\_ / \_\_\_\_

Name: \_\_\_\_\_

Student Number: \_\_\_\_\_

**Answer the questions below. Make sure to show your work and provide complete geometric explanations for full credit.**

- 1 Label the net for the figure below with its dimensions.

A. \_\_\_\_\_

B. \_\_\_\_\_

C. \_\_\_\_\_

## Geometry Midterm Exam

---

- 2 Name four rays shown.

- 3 You live in Carson City, Nevada, which has approximate (latitude, longitude) coordinates of (39N, 120W). Your friend lives in Ottawa, Ohio, with coordinates of (41N, 84W). You plan to meet halfway between the two cities. Find the coordinates of the halfway point. Show your work.
- 

- 4 Write the conditional statement that the Venn diagram illustrates.

- 5 Is the following conditional true or false? If it is true, explain why. If it is false, give a counterexample.

If it is snowing in Dallas, Texas, then it is snowing in the United States.

## Geometry Midterm Exam

- 6 What is the value of  $x$ ? Justify each step using proof reasoning.

$$AC = 32$$

Drawing not to scale

$$AB + BC = AC \quad \text{a. } \underline{\hspace{2cm}}$$

$$2x + 6x + 8 = 32 \quad \text{b. } \underline{\hspace{2cm}}$$

$$8x + 8 = 32 \quad \text{c. } \underline{\hspace{2cm}}$$

$$8x = 24 \quad \text{d. } \underline{\hspace{2cm}}$$

$$x = 3 \quad \text{e. } \underline{\hspace{2cm}}$$

## Geometry Midterm Exam

- 7 Give the missing reasons in this proof of the Alternate Interior Angles Theorem.

Given:  $l \parallel n$   
 Prove:  $\angle 4 \cong \angle 6$

| Statements                   | Reasons  |
|------------------------------|----------|
| 1. $l \parallel n$           | 1. Given |
| 2. $\angle 2 \cong \angle 6$ | a. ?     |
| 3. $\angle 4 \cong \angle 2$ | b. ?     |
| 4. $\angle 6 \cong \angle 4$ | c. ?     |

a. \_\_\_\_\_

b. \_\_\_\_\_

c. \_\_\_\_\_

- 8 Based on the given information, can you conclude that  $\triangle QRS \cong \triangle TUV$  ? Explain.

Given:  $\overline{QR} \cong \overline{TU}$ ,  $\overline{QS} \cong \overline{TV}$  and  $\angle R \cong \angle U$ , prove  $\triangle QRS \cong \triangle TUV$

## Geometry Midterm Exam

- 9 Write the missing reasons to complete the proof.

Given:  $\overline{AB} \cong \overline{CD}$ ,  $\angle A \cong \angle D$ , and  $\overline{AF} \cong \overline{DE}$

Prove:  $\triangle FAC \cong \triangle EDB$

| Statement                              | Reason                              |
|--|-------------------------------------|
| 1. $\overline{AF} \cong \overline{DE}$ | 1. Given                            |
| 2. $\angle A \cong \angle D$           | 2. Given                            |
| 3. $\overline{AB} \cong \overline{CD}$ | 3. Given                            |
| 4. $AB = CD$                           | 4. Definition of congruent segments |
| 5. $AB + BC = CD + BC$                 | 5. ?                                |
| 6. $AC = BD$                           | 6. Segment Addition Postulate       |
| 7. $\overline{AC} \cong \overline{BD}$ | 7. Definition of congruent segments |
| 8. $\triangle FAC \cong \triangle EDB$ | 8. ?                                |

Step 5: \_\_\_\_\_

Step 8: \_\_\_\_\_

## Geometry Midterm Exam

**10** Fill in the missing reasons to complete the proof.

Given:  $\angle VUY \cong \angle UWT \cong \angle X$ ,  $UY \parallel TX$

Prove:  $\overline{UW} \cong \overline{UT}$

| Statement                                  | Reason  |
|--|---|
| 1. $\angle VUY \cong \angle X$             | 1. Given  |
| 2. $\overline{UW} \parallel \overline{XY}$ | 2. Converse of the Corresponding Angles Postulate |
| 3. $\angle T \cong \angle VUY$             | 3. ?  |
| 4. $\angle VUY \cong \angle UWT$           | 4. Given  |
| 5. $\angle T \cong \angle UWT$             | 5. Transitive Property                            |
| 6. $\overline{UT} \cong \overline{UW}$     | 6. ?  |

Step 3: \_\_\_\_\_

Step 6: \_\_\_\_\_

## Geometry Midterm Exam

- 11 Is  $\triangle ABD \cong \triangle CBD$  by HL? If so, name the legs that allow the use of HL.

- 12 Complete the proof by providing the missing reasons.

Given:  $\overline{CB} \perp \overline{BD}$ ,  $\overline{DE} \perp \overline{EC}$ ,  $\overline{CB} \cong \overline{DE}$

Prove:  $\triangle DBC \cong \triangle CED$

| Statement  | Reason                                  |
|--|---|
| 1. $\overline{CB} \cong \overline{DE}$ , $\overline{CB} \perp \overline{BD}$ , and $\overline{DE} \perp \overline{EC}$ | 1. Given                                |
| 2. $\angle CBD$ and $\angle DEC$ are right angles  | 2. Definition of perpendicular segments |
| 3. $\angle CBD \cong \angle DEC$   | 3. <u>  ?  </u>                         |
| 4. $\overline{CD} \cong \overline{CD}$   | 4. <u>  ?  </u>                         |
| 5. $\triangle DBC \cong \triangle CED$   | 5. <u>  ?  </u>                         |

Step 3: \_\_\_\_\_

Step 4: \_\_\_\_\_

## Geometry Midterm Exam

Step 5: \_\_\_\_\_

---

- 13 Write a paragraph proof to show that  $\triangle ABC \cong \triangle DEC$ .

Given:  $\overline{AC} \cong \overline{DC}$  and  $\overline{BC} \cong \overline{CE}$

- 14 Given:  $\overleftrightarrow{AB}$  is the perpendicular bisector of  $\overline{IK}$ . Name two lengths that are equal.

## Geometry Midterm Exam

- 15** Li went for a mountain-bike ride in a relatively flat wooded area. She rode for 6 km in one direction and then turned and pedaled 16 km in another. Finally she turned in the direction of her starting point and rode 8 km. When she stopped, was it possible that Li was back at her starting point? Explain.

- 
- 16** Find the measures of  $\angle PMN$  and  $\angle NMR$  if  $\overrightarrow{MN}$  bisects  $\angle PMR$ . The measure of  $\angle PMR$  is  $136^\circ$ . Explain your answer.

- 
- 17** Judging by appearance, classify the figure in as many ways as possible using *rectangle*, *square*, *quadrilateral*, *parallelogram*, *rhombus*. Please justify your answers

## Geometry Midterm Exam

---

**18** For a regular  $n$ -gon:

- a.** What is the sum of the measures of its angles?
- b.** What is the measure of each angle?
- c.** What is the sum of the measures of its exterior angles, one at each vertex?
- d.** What is the measure of each exterior angle?
- e.** Find the sum of your answers to parts **b** and **d**. Explain why this sum makes sense.

a.

b.

c.

d.

e.

## Geometry Midterm Exam

- 19** Find the midpoint of each side of the trapezoid. Connect the midpoints. What is the most precise classification of the quadrilateral formed by connecting the midpoints of the sides of the trapezoid?

- 20** Use the Distance Formula and the  $x$ -axis of the coordinate plane. Show why the distance between two points on a number line (the  $x$ -axis) is  $|a - b|$ , where  $a$  and  $b$  are the  $x$ -coordinates of the points.
