CONSENT TO ADMISSION

I, Sally Pire hereby consent to admission to the Global Care Medical Center (ASMC) , and I further consent to such

routine hospital care, diagnostic procedures, and medical treatment that the medical and professional staff of ASMC may deem necessary or advisable. I authorize the use of medical information obtained about me as specified above and the disclosure of such information to my referring physician(s). This form has been fully explained to me, and I understand its contents. I further understand that no guarantees have been made to me as to the results of treatments or examinations done at the ASMC.

CONSENT TO RELEASE INFORMATION FOR REIMBURSEMENT PURPOSES

In order to permit reimbursement, upon request, the Global Care Medical Center (ASMC) may disclose such treatment information pertaining to my hospitalization to any corporation, organization, or agent thereof, which is, or may be liable under contract to the ASMC or to me, or to any of my family members or other person, for payment of all or part of the ASMC's charges for services rendered to me (e.g. the patient's health insurance carrier). I understand that the purpose of any release of information is to facilitate reimbursement for services rendered. In addition, in the event that my health insurance program includes utilization review of services provided during this admission, I authorize ASMC to release information as is necessary to permit the review. This authorization will expire once the reimbursement for services rendered is complete.

ADVANCE DIRECTIVE

Your answers to the following questions will assist your Physician and the Hospital to respect your wishes regarding your medical care. This information will become a part of your medical record.

	YES	No	PATIENT'S INITIALS
1. Have you been provided with a copy of the information called "Patient Rights Regarding Health Care Decision?"	X		
2. Have you prepared a "Living Will?" If yes, please provide the Hospital with a copy for your medical record.	X		
3. Have you prepared a Durable Power of Attorney for Health Care? If yes, please provide the Hospital with a copy for your medical record.	X		
4. Have you provided this facility with an Advance Directive on a prior admission and is it still in effect? If yes, Admitting Office to contact Medical Records to obtain a copy for the medical record.	X		
5. Do you desire to execute a Living Will/Durable Power of Attorney? If yes, refer to in order: a. Physician b. Social Service c. Volunteer Service	X		

HOSPITAL STAFF DIRECTIONS: Check when each step is completed.

1. Verify the above questions were answered and actions taken where required.

2. If the "Patient Rights" information was provided to someone other than the patient, state reason:

Name of Individual Receiving Information

Relationship to Patient

3. If information was provided in a language other than English, specify language and method.

4. Verify patient was advised on how to obtain additional information on Advance Directives.

5. Verify the Patient/Family Member/Legal Representative was asked to provide the Hospital with a copy of the Advanced Directive which will be retained in the medical record.

File this form in the medical record, and give a copy to the patient.

Name of Patient Name of Individual giving information if different from Patient

PATIENT HISTORY

PROBLEMS: 1. Arteriosclerotic cardiovascular disease; 2. Past history of alcoholism; 3. Past history of hypokalemia; 4. Past history of gastritis.

MEDICATIONS: Lanoxin 0.125 milligrams a day
Lasix 20 milligrams a day
Klotrix tablets 1 tablet three times daily

PAST MEDICAL HISTORY: Patient has had some problems with alcohol in the past and a history of gastritis due to excessive alcohol intake. She had a fractured wrist last year potentially a secondary injury due to excessive inebriation. She also has recently been put on Lanoxin and Lasix, apparently for arteriosclerotic cardiovascular problems, as she experienced mild angina. Subsequent to her second admission in YYYY, she was referred to General Hospital for further evaluation and treatment of her abnormal liver function studies. It was determined at that time that she did not have an active process.

ALLERGY TO ASPIRIN

FAMILY HISTORY: History of alcoholism on mother's side and cardiovascular disease on father's side. Brother has had heart attack related to coronary artery disease.

SOCIAL HISTORY: She works as a nurse's aide. She's a moderate smoker. Denies heavy drinking, but we are not quite sure about that.

DISCHARGE SUMMARY

ADMISSION DATE: 06/30/YYYY DISCHARGE DATE: 07/07/YYYY

ADMISSION DIAGNOSIS: 1. Viral pneumonia; 2. Arteriosclerotic cardiovascular disease; 3. Past history of alcoholism; 4. Past history of hypokalemia; 5. Past history of gastritis.

DISCHARGE DIAGNOSES: Pneumonia. Arteriosclerotic cardiovascular disease.

SUMMARY: This is a 61-year-old white female who has been doing fairly well recently until the onset of an upper respiratory infection with a cough, recurrent chills, sweats, fever. She tried to work, was unable to. Her temperature went to 102. Abdominal x-ray showed a pneumonia, and I felt that she should be admitted for further evaluation and treatment.

Work-up has included a chest x-ray which revealed a small area of infiltrate in the lingular of the right side compatible with an acute pneumonia; a follow-up study is suggested. Repeat chest x-ray showed bilateral pneumonia, clearing; however, there was a remaining area of consolidation in the lateral portion of the middle lobe. Her urine showed a specific gravity of 1.015, albumin and sugar were negative, white blood cells rare, red blood cells 0-6. White count 15,000. Hemoglobin 11.8, hematocrit 34.8, segmented cells 52, lymphocytes 18, monocytes 12, eosinophils 3, and 5 band cells. Complete blood count was normal. Sodium 137, potassium 3.4, carbon dioxide 27, chloride 97, alkaline phosphatase 10.4, blood sugar 81, cholesterol 138, Serum glutamic oxalacetic transaminase 42, Lactate dehydrogenase 260, creatinine 0.4, calcium 8.3, phosphorus 2.2, bilirubin 1.2, total protein 6.1, albumin 3.2, uric acid 0.5. Sputum culture grew out a 1+ enterobacter. Cardiogram was reported as showing sinus tachycardia; this later slowed down clinically.

She was started originally on Ampicillin 500 milligrams, four times a day, Intermittent positive pressure breathing. She was continued on her Lanoxin 0.125 a day, Lasix 20 milligrams a day, Klotrix tablets 1 tablet three times a day. Her temperature stayed up, her Ampicillin was stopped, and she was switched to Enalapril 500 milligrams, four times a day. Now her temperature has been normal for 48 hours. She feels better, and her cough has lessened. She is up ambulatory, and she is anxious to go home. She is being discharged at this time on E-Mycin 333 milligrams, three times a day and Afrin nasal spray. She will continue on her Lanoxin 0.125 milligrams a day, Lasix 20 milligrams a day, and should be seen in follow-up in the office early next week.

CURRENT VISIT & PHYSICAL EXAM

ADMISSION DIAGNOSIS: 1. Bacterial pneumonia; 2. Arteriosclerotic cardiovascular disease; 3. Past history of alcoholism; 4. Past history of hypokalemia; 5. Past history of gastritis.

CHIEF COMPLAINT: Shortness of breath.

HISTORY OF PRESENT ILLNESS: This is a 60-year-old female who has been in the hospital on two occasions within the past year or two. Her last admission was related to some problems with alcohol. Prior to that she had been in with some abnormal liver function studies that were later evaluated at Strong. Recently she's been doing fairly well until a few days ago when she had the onset of upper respiratory symptoms. She continued to work. She now is coughing, having chills, fever, and sweats. She was seen and evaluated in the office this morning. She had fever of 102. We referred her over for a chest x-ray which showed pneumonia of the left lung field, and she subsequently was admitted for further investigation, evaluation, and treatment.

FAMILY HISTORY: History of alcoholism on mother's side and cardiovascular disease on father's side. Brother has had heart attack related to coronary artery disease.

SOCIAL HISTORY: She works as a nurse's aide. She's a moderate smoker. Denies heavy drinking, but we are not quite sure about that.

REVIEW OF SYSTEMS: She has hacking cough, slight dyspnea on exertion, 2 pillow orthopnea, no hemoptysis. Appetite has been fair. She denies any specific bowel or bladder symptomatology.

PHYSICAL EXAMINATION: VITAL SIGNS: Temperature 102. Pulse 90, Respirations 24.

SKIN: Warm, dry.

EYES: pupils round, reactive and equal. Extraocular muscles intact. Sclera clear; no evidence of any jaundice. Nose and throat are unremarkable.

NECK: Supple. No nodes or thyroid abnormalities.

CHEST: Scattered rales and rhonchi at both mid-lung fields. HEART: Sounds are somewhat distant. No significant murmurs are heard. BREASTS: Soft and free of masses.

ABDOMEN: No palpable organomegaly or masses. No tenderness or bruits. Bowel sounds normally active.

PELVIC: Not done. RECTAL: Not done.

EXTREMITIES: Warm, pulses good.

NEUROLOGIC: Okay.

RADIOLOGY REPORT

Date of X-ray: 07/05/YYYY

REASON: Pneumonia

TECHNICAL DATA: Posteroanterior and lateral.

CHEST: Posteroanterior and lateral views reveal partial clearing of the lingular pneumonia since 06/30/YYYY. There is now an area of consolidation in the lateral portion of the middle lobe. The lungs otherwise appear clear.

CONCLUSION: Bilateral bacterial pneumonia.

RADIOLOGY REPORT

Date of X-ray: 06/30/YYYY

REASON: Rule out pneumonia.

TECHNICAL DATA: Please call.

06/30/YYYY

CHEST: Posteroanterior and lateral views reveal a small area of infiltrate in the lingual. This would be compatible with an acute pneumonia and a follow-up study is suggested. The heart is of normal size and the lungs otherwise appear clear. There is an old fracture in the lower thoracic spine and several old healing left rib fractures.

PATIENT PROPERTY RECORD

I understand that while the facility will be responsible for items deposited in the safe, I must be responsible for all items retained by me at the bedside. (Dentures kept the bedside will be labeled, but the facility cannot assure responsibility for them.) I also recognize that the hospital cannot be held responsible for items brought in to me after this form has been completed and signed.
