Course Start Date: 02/13/2017

Section: Exploring Scholarly Information and Historical Roots in Psychology

Week: 5

Activity: Develop A Historical Development Timeline Presentation

Activity Due Date: 03/19/2017

Activity Description

For this assignment, you will prepare a presentation of historical points of interest related to the field of psychology.

Develop a presentation explaining at least five key individuals or aspects of psychology's history. Look to span the breadth of psychology's prehistory (from the Greek philosophers to the emergence of the field in the late nineteenth century, and include a slide to describe how psychology emerged and when.

Using the skills you developed in Week 4, support your presentation with at least three scholarly resources in addition to any provided in this week's materials. In addition to these specified resources, other appropriate scholarly resources may be included.

Length: 10-12 slides plus a reference slide

Notes Length: 100-150 words for each slide

References: Include a minimum of three scholarly resources.

Create a professional presentation (using PowerPoint, Prezi, etc.) that incorporates appropriate animations, transitions, graphics, and speaker notes. The speaker notes may be comprised of brief paragraphs or bulleted lists. Be sure to add a reference slide or transition for all the references you use. Be sure to add your last name in the footer of each slide.

Your presentation should demonstrate thoughtful consideration of the ideas and concepts presented in the course by providing new thoughts and insights relating directly to this topic. Your paper should reflect scholarly writing and current APA standards. Be sure to adhere to Northcentral University's Academic Integrity Policy.

Upload your assignment using the Upload Assignment button below.

Learning Outcomes

- 1.0   Examine historical and theoretical development in the field of psychology.
- 2.0   Manage effective learning strategies for success in graduate studies in psychology.
- 3.0   Explore research skills applicable in the field of psychology.
- 4.0   Develop logical, persuasive arguments about psychological principles.
