5. Present your project to the class

    When developing your idea/design, and when presenting your project to the class, we
    will focus on the following aspects:
    - IV & DV   What is your IV construct? What is your IV manipulation? Do they match?
                   What is your DV construct? What is your DV measure? Do they match?
    - Hypothesis   What is your hypothesis? Does it match your IV & DV?
                   "What evidence will answer the hypothesis/research question?"
